

# Boom Pole

- Extension tubes are built out of light weight graphite
- All metal Aluminium knuckles
- 26 Inches when fully collapsed
- 8.5 feet when fully extended
- The boom pole only weighs a mere 1.5lbs
- A dual-rubber bumper foot to protect it when resting the pole
- Standard 3/8" threaded mount at the tip with a rubber gasket
- Air-Vent holes at the tip to help the pole smoothly collapse and extend
- Includes a re-enforced carrying case

## **Lightweight Graphite Extension Tubes and All-Metal Aluminum Knuckles**

One of the standout features of the Deity Boom Pole is that it is made of lightweight graphite extension tubes, making long takes easier to manage, perfect for reality TV and ENG. Additionally, the all-metal aluminum knuckles provide added strength and durability, ensuring that the boom pole can withstand the rigors of daily use.

## **Compact and Adjustable**

The Deity Boom Pole is also designed to be compact and adjustable. When fully collapsed, it measures just 26 inches, making it easy to store and transport. When fully extended, it reaches a length of 8.5 feet, providing ample reach for capturing audio in a variety of settings. In addition to its highly adjustable size, it weighs a mere 1.5 lbs, making it even more portable.

## **Dual-Rubber Bumper Foot**

One of the unique features of the Deity Boom Pole is its dual-rubber bumper foot, which protects it from damage when resting on the ground. This is particularly useful when working on rough or uneven terrain, as it ensures that the graphite extension tubes on the pole remain protected.

## **Standard 3/8 Threaded Mount**

Another valuable feature of the Deity Boom Pole is its standard 3/8" threaded mount at the tip, which is compatible with most microphones and shock mounts. This allows professionals to easily attach their preferred microphone and recording equipment to the pole, without the need for additional adaptors or accessories.

## **Reinforced Carrying Case**

The Deity Boom Pole comes with a reinforced carrying case with a zippered cap that provides added protection during transport. This is especially useful for professionals who need to travel frequently for work and need to ensure that their equipment is protected.

## **Vented Portholes**

Finally, the Deity Boom Pole also includes vented portholes at the tip, which assist in the smooth collapse and extension of the pole. This is especially helpful when working in fast-paced environments, as it allows for quick and easy adjustments to be made to the pole's length.
