

# V-Link

## Product Description

The V-Link is the cleanest and simplest way to connect your 3.5mm video microphones to an XLR-based camera or audio recorder. The low-profile right angle XLR jack keeps the cable runs clean and neat and the built-in 12" coiled 3.5mm cable means the user doesn't have to worry about the two pieces separating like when using a traditional phantom power adapter. The V-Link adapts the 48V phantom power supplied by the XLR input it's plugged into and converts it to a 3V Plug-In Power signal, mimicking the traditional 3.5mm TRS jack that video microphones are designed to be used with.

## What makes V-Link Different?

- 1) **Low-Profile and Right Angle:** Reduces the bulk build up around the XLR jack on a camera.
- 2) **Built-In Cable:** Keeps the profile of your input plug that much smaller and reduces possible breaks in your signal chain.
- 3) **Zero Noise:** The 48V conversion circuit introduces zero additional noise to your audio signal.

## Sales & Shipping Information

Product Name	V-Link
Package Dimensions	10*18*2cm
Package Weight	33g
Carton	120pcs
Carton Size	42.5*37.5*27cm
Carton Weight	11.4 pounds
